

Brown Trucking Company Enters 9th Year as a SmartWay Transport Partner

Industry: Carrier

Brown Trucking Company successfully completes its 2016 emissions reporting with SmartWay Transport Partnership. SmartWay's Partner tools are used to measure progress toward cleaner air and more sustainable business practices.

Lithonia, GA - March 10th, 2017

Brown Trucking Company a leading worldwide provider of transportation, logistics and supply chain solutions, continues its commitment to track and report its carbon accounting practices for a ninth consecutive year. Freight transportation is one of the fastest growing impacts on the environment and as consumer demand increases, we are committed to respond with the most efficient and cleaner transportation practices.

Brown Trucking Company is a U.S. Environmental Protection Agency (EPA) SmartWay® Transport Partner. EPA recently approved our annual submission of Partnership reporting requirements for 2017. Brown joined the SmartWay initiative in 2008. Each year performance data is submitted and reviewed to qualify as a SmartWay partner.

SmartWay is a voluntary and cost-free program that supports companies' initiatives to reduce greenhouse gas emissions from freight supply chain transportation activities. Operational strategies, data management tools and verified technology supports are provided. The SmartWay Partnership is a domestic and international freight and supply chain program that manages data for over 3500 partners across all domestic shipping modes in the US and Canada. SmartWay implements its goals to lower freight carbon footprints by conducting analysis and research of freight impacts, engaging with freight experts, anticipating and responding to trends, developing strategic resources and

communication strategies, and serving as an international model. International collaborations exist with Mexico, China and other Asian nations, Europe, and Latin America.

“Brown Trucking Company knows that partnering with SmartWay is good for business, people and the environment,” says Cheryl Bynum, U.S. EPA’s SmartWay Director, “By partnering with us, [Company Name] is demonstrating their commitment to sustainability through cleaner, lower carbon goods movement.”
